A Prognostication.

FOr the hearing, and determining of all Contrasts, Discords, and such like matters in the Common-wealth, these 4. times commonly called the *Termes*, be appointed, in which the learned Judges set an end of Contention, and debate, betwene party and party.

Every of these 4. *Termes*, consists of 4, 5, or 8. *Returnes*, and every day serving unto a severall purpose.

Note then, that every *Terme* hath part of these 6. kinde of *Returnes*, viz. *Crasino Octabis*, *Quind*: *Tres Mense & Quinq*; *Crasino*, is the Morrow after the *Basis*, or day nominated: as *Crasino Trinitatis*, is the morrow after *Trinity Sunday*, it being the *Basis*, and that day gives the denomination. *Octabis* is 8. dayes after inclusively. *Quin*: is 15. dayes after, *Tres* that day 3 weekes, *Mense* that day Moneth, and *Quinq*; that day five weekes.

Now every of these *Returnes*, hath 4. severall dayes, whereon they consist: the first whereof hath a double signification, the one is the day of *Returne*, and the other the day of *Essoyne* for the Defendant, in a personall action, or the Tenant in a reall action, to be *Essoyned*. The second, is the day of *Exception*, for the Plaintiff or defendant to lay an *Exception*, if no *Essoyne* bee cast, that the Defendant shall not bee *Essoynd*, or *Amerced*. The 3. is *Returna Brevium*, that is, the day whereon the Sheriffe must returne the *Writ*. The 4. is the day of *Appearance* for Parties, and Jurors in the Court of *Common Pleas*.

If any of these dayes fall upon an Holy-day, that is no Court day, as in *Hillary Terme*, upon the day of *Purification*: In *Easter Terme*, upon *Ascension day*; In *Trinity Terme*, upon the Nativty of Saint Iohn Baptist; And in *Michaelmas Terme*, upon the day of *All-Saints*, or upon any Sunday (all which, bee no Court dayes) then must the next day following serve for both, as if the *Essoyne day* fall upon Sunday, then Munday must serve for the *Essoyne day*, and also the day of *Exception*.

These dayes have all most use in the Court of *Common Pleas*.

But *Latitars*, or other Proces upon a Bill certaine, it is upon a day certaine: As *Die tunc proximo post Purif*: which must alwayes be reckoned from the *Essoyne day*.

Wood-house. 1642.

In the Starre-Chamber, Chancerie, Court of Wards, and Court of Requests, they use none of these Returnes, but onely the day of Appearance, which is *Quarto Die post*.

Yet note well, that if a *Capias*, *Exigent*, *Scire facias*, or a *Disstringas* be executed after the day of Effoyne, by the Sheriffe of a Commission late upon out of any the aforesaid Courts, after the said Effoyne day, it is neither justifiable, nor warrantable.

The Law-dayes in the Court of *Arches*, *Audience*, *Prerogative*, *Consistory* in *S. Pauls*, *Delegates*, *Admirall Court*, and *High-Commission*, as they be usually kept in the Terme-time.

A Prognostication.

THe first day after every of these Feasts set downe for every Terme the Court of the *Archies* is kept in the forenoone in *Bow Church*. And the *Admiralls* Court the same day in the afternoone.

The second day after every of the sayd Feasts, the *Audience* Court is kept in the forenoone in the Consistory in *Saint Pauls*, and the *Prerogative* Court in the same place, in the afternoone. The 3 day following every of the sayd Feasts, the Bishop of *London* his *Consistory* Court is holden in *Saint Pauls* in the forenoone, and his Majesties Court of *Delegates* in the same place in the afternoone. The fourth day following the sayd Feasts, his Majesties Court of *High Commission*, is kept in the Consistory in *Saint Pauls*, or (as of late yeares) at *Lambeth*, on Thursday afternoone. But if any of the dayes before recited bee Sunday, or an holy day, then is such Court kept the day following.

In *Hilary Terme*, 4. of the above named Court dayes, bee ordinarily kept, and as many in *Easter* and *Trinity Termes*: according to the course of the yeare, as the Iudge of the *Archies* in his discretion shall think good, who at the end of every Terme apPOINTETH the Court dayes to be kept in the next Terme, but in *Michaelmas Terme*, the Courtdayes (if they be not altered) were wont certainly to be kept.

My advise therefore to all Country-men is (especially those that dwell farre off) being cited by any originall processe to appear in the *Archies*, *Audience*, *Prerogative*, or *Delegates*, to send to some *Proctor*, a note of the cause, and to what Court they bee cyted, to appeare for them, and to returne them word of the very Day in which it shall be needfull for them to appeare in person.

But in the course of practise in the *High Commission*, and the *Admiralls* Court, it is otherwise, for every person then cited to those Courts, must appeare personally.

But of some of the said Courts before rehearsed upon more consideration hereafter, according to command from lawfull Superiours, it shall be divulged.

Gene-

Wood-houle 1642.

Generall Observations, and profitable to be regarded.

Remoue, and let young Trees, from October vntill February, setting alwayes that side towards the Sunne, which was before, the Wind being Southerly, or West, the weather warme, dry, and at new Moone.

Graft and plant Trees, the Moone being new, in Taurus, Virgo, Capricorne, in faire, dry weather, the wind, S. or west.

Cut vines in December, or Ianuary.

Fell timber to continue, and to auoid wormes, in December, or Ianuary, 2, or 3. dayes before the Moone change.

But if you will haue it to grow againe, in the new Moone is best.

Cut hedges betweene the change and full Moone, from the end of Ianuary, vntill May.

Sheare Sheep, cut hayze, and sow all manner of Cozne in the new of the Moone.

Set and sow all kinde of Seeds, the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricorne, Aquarius, or Pisces, but not Seeds whose roots be round they should be sowne or set 3 or 4. dayes before or after a full Moone.

Dung land that weeds may not abound, in the last quarter

Seld or lib cattell, the Moone in Aries, Libra, or Sagitaris, after a full Moone: but you may let them blood at any time, the signe not being in the heart, nor in the place where the Incision is to be made, nor in the day of the Moones change.

Gather flowers, or Seeds such as you mind to keep all the yeare at the full Moone. Dry them in the shade till they be almost dry, and then sunne them a little lest they mould, or corrupt, (if they will endure the beames of the Sun.)

Gather Apples, and Mardens, in the last quarter of the Moone; lay euery sort by it selfe without any fallings among them vpon the bare boords or plastered floore, vntill the end of Novem. (the thinner the better they lye,) let the place bee shut close in frosty cold weather, then couer them ouer with straw, hay, or barley chaffe, will not be amiss: but Mardens so gathered, and layd on dry boards, need not any couering.

A Prognostication.

Cautions Phisicall.

TAKE no Phisick in the Dogge dayes, in the extreame heat of Sommer, nor in the extreame cold of Winter, unles in dangerous diseases, as plurisy, apoplexy, plague, &c neither let blood.

A purgation will purge the humors best, when the Moon is in *Cancer, Scorpio, Pisces*, with an Aspect of *Venus*.

It is bad purging when the Moon is in *Leo*. Sup not too late any time, but rise betimes in the morning especially in the Spring and Summer. Drinke before you wash in the morning, combe your head the hayre backward, it purgeth Rheume and cleareth the eyes, wash behind your eares with cold water, an enemy to Toothache, wash hands often, feet more seldome, head not at all.

Retaine not over long superfluous excrements, as Urine, &c. keep warme head, neck feet, in Autum and Winter.

Study, neither read much upon a full stomach; A good signe of digestion is to be cold after meate Exterior parts.

Eate not much fruits in Autum or Haruest, &c. To avoyd infection and prevent ill smels, Ayre your garments outward with brimstone burning, and eat hearb grace, with fresh butter, or drink wormewood, or Dragon water salting. It is good to eate, so that thou rise partly a hungry, because the stomach may bee clogged wanting digestion and heat. Rosemary, Damask Roses, Rue, Camamile, Nutmegs, Frankincense, Hysop, Balme, Mints, and Marjoram good for the head. Fennell, Vervain, Cold-water, Celendine, Eibright white Rose water and *Lapis Calminarius*, *Ægrimony* good for the eyes. Wormwood, Quinces, Barbaries, Olives, Caphers, Nutmegs, Cloves, Aloes good for the stomach.

Saffron, Cloves, Mace, Nutmegs, Marjoram, Burrage, Buglosse, Rosemary, Aloes, Marygold-flowers, Harts horne good for the heart. Raysons, Wormwood, Liverwort, Saffron, *Ægrimony*, Endive, Violets, Fennell, Plantain, Dragon water and Rose, Lettuce, Saunders, wash hands, al those be good and coole the liver.

Lungwort, Almonds, Dates, Raisons, Liccoris, Ellicampaine, Penides, Maiden-heart, Coltsfoot took instead of Tobacco, good for the lungs.

Hot meats and drinks, nuts, sweet meats and drinks, raddish, bitter or sower meats, milk, leeks, colworts, limons, hurtful to teeth. Drunkennes, much sleep, raddish, much watching, great labour, lechery, salt meats, sweetthick wine, smock, dust, fire, garlick, leeks, and onyons, all these hurtfull to the Eyes.

Excol.

Excellent Notes of Husbandry, and Gard-
ning, for every Moneth in the yeare.

January.

In January cut down Timber, and it shall not chinke
and bee eaten with wormes (in the last quarter of the
Moone) Set or sow kernels, and berties of Bay trees,
Privet and Box, Set quicksets, Rose trees, Peaches,
Filberds, and Plumtrees: And remove Trees if the frost
bee not too hard, prune and loppe them befoze the
full of the Moone: Sow or set Beanes and Pease, and
dung Land in the last quarter: Geld Cattell for to
reare: fallow Land for wheate and Rie: Trench Gar-
dens with dung: And remove Bees, for your owne health
keepe your body warme: Let good and wholesome dyet be
your Physitian, moderat exercise and labour your saluoe
to cause appetite.

February.

Now sow all sorts of Pease, and Beanes, and othee
Pulse, Sow Mustard seed: Cast vp ditches: set
and plant Vines, Hoppes, Gooseberries, and any fruit
that growes vpon bushes: Prune, and trim all sorts of fruit
trees from Mousse, Canker, and all superfluous branches,
Graft in the later end of the moneth, Sow Onions in
cold, stiffe land; Take heed of cold, forbear sleigmatick
meates.

March.

In the new of the Moone (the winde any but South
or West) graft Pearre, Marden, or Apple Trees, make
an end of sowing all manner of Pulse, and begin to
sow Dates, Barley, Barlentys, Onions, Carrets, Cowa-
cumbers, Melons, and all kind of Potheards, Slip Arti-
chokes and Sage; Geld Lambes; Let blood according to
strength and necessity, the Signe, and weather also being
fit;

A Prognostication.

fit ; but take aduise of the learned Physitian) looke what disease cannot bee cured in the spring time by Physicke, will hardly be cured all the yeare after.

April.

Sow Barly, Hemp, and flax, Pole hops; set and sow all kind of garden Hearbes; Open Hives, and let Bees labour for their living: Let Tanners now provide them for barke, And all Good housewives looke to their dayties; Bleed and purge, with aduise: those that are troubled with Aches, or the Gout, let them goe to the Baths in this or either of the Moneths.

May.

Sow Barly on all light sands and bearing grounds, Sand likewise hemp and flax, and all manner of fine seeds and hearbs; Take Lambs from their damms; Set land for Wheate and Rie, Leane looping of trees; Teach Hoppe to cline, but cut off the superfluous branches; Rise early, walke the fields, especially by running streames, Sage, and sweete Butter is now an excellent breakfast, Sage and Clarified whey, as also, Scuruigrasse-Be, and Wormwood Beere, are wholesome drinks to be drunk fasting.

Iune.

Sheare Sheepe, bring home setwell, Meele corne, and gardens, set Holemarr, Cornations, and Gilliflowers; sow Lettice, and Radish seed 3. or 4. days after the full, for then they will not runne to seed, Make hay, carry Sand, Lime, Marle, and manure of what kind soever besitting your land. Cut neither Hedge nor tree in this, and the two next months. Beware of great thirst; Use thin and light dyet, moderate exercise and chaste thoughts.

July

Wood-house 1642.

Julie.

Apply making, and getting in of Hay, pull Hempe that is ripe, gather garden Beanes, Get Rue and Wormwood and Saule to strow on your floozes to destroy Moths, and fleas. Fence your Coples, vse moderate dyet, take heede of great thirst, for nothing bringeth the Pestilence or Pestilent diseases sooner then extreame Thirst and feruent heates, and cold taken also sodainly vpon them. Take no Physicke: Bleed not but vpon all violent occasions.

Labour in Summer, take paines with the Ant,

Else in the winter line poore and in want.

August.

Follow close your corne harvest. Sow winter hearbs in the new of the Moone: Gather garden seeds, Mow Barly and Ores; Gather your summer fruits, refraine from sleeping in the day time after meate: Avoyd riot and excessse.

September.

In the beginning of this Month, and end of the former, gather Hops when they may be torne, the weather being faire, and no dew on the ground; kill Bees; Make Mercurie; sow Wheate and Rye; Remoue and let all slips of Flowers, between the two Lady dayes; Put Swine to mast: Remoue trees, euery new Moone from September, untill February, especially in the new of the Moone the weather faire, and warme, the wind South or West. Vse Physicke moderately: so beare fruits too pleasant or rotten, shun riot and excess of dyet.

October.

Sow Wheate and Rye, the sooner the better for feare of straine: Set Acorns, and Nuts, Gather winter fruit, the weather dry, in the after Moone. And in the wane of the Moone. Cut Rose trees (if you desire to haue store of Roses) do this once in two yeares: Refuse not any needefull Physicke from the hands of the learned. And vse moderate sports to reuiue the vitall spirits to the service of God only.

Nov.

A Prognostication.

November.

MThe Malt. Kill Hogs. Trench gardens with dung. Set Crabtree stocks. Sow wheat, and Rye, in exceeding hot sandy grounds. Cut down timber for Plowes, Carts and other Implements for husbandry: Use wholesome meate, and drinke, with good exercise to preserve health.

December.

In this and the next Moneth cut downe great timber in the last quarter of the Moone. Uncouer the rootes of fruit Trees. Set Beanes, and Pease. Cover all your best flowers and hearbes from frosts and stormes, with old rotten horse dung. Look well to your cattell. Water and keep moist your meadowes. Let horses bloud. And (to conclude) Drinke good Wine, and strong drinke. Keepe thy body warme clad, thy house warme and dry. Banish all cares from thy heart, and feast thy poore neighbours reioycing that God sent his onely begotten Son about this time into the world to save all such that lay hold on him with a true and lively faith.

Coniectures of weather by the Moone.

When the Moone doth change be at full or enter into her first or last quarter in Aries, Leo, or Sagittarius, in the Winter it is commonly faire, but in Summer hot, especially in June, and Iuly.

If the change, be at the full, or enter into the first or last quarter, in Taurus, Virgo, or Capricorne, in Winter it is like to be cold, but in Summer temperate.

When she is at the same time in Libra, Gemini, or Aquarius, then look for wind, especially in the spring or March.

But if the Moone be at the full or change, or either quarters, in Cancer, Scorpio, or Pisces, in Winter Judge of moyst and rainy weather, and sometimes Snow, but in Summer good and temperate weather for the most part, yet some

Wood-house. 1642.

Sometimes it raineth then especially when Venus is aspected with the Moone.

Signes of faire weather.

The Sunne rising and setting cleere, the Moone also cleere 3. dayes before the full: Spots appearing in a full Moone towards Sunne set: Clouds with golden edges: a Cloudy Skie clearing against the wind: A Raine Bow appearing only red and yellowish: A red opening, and a gray Morning: the Crow crying betimes in the morning: many Bats flying abroad sooner then ordinary: a white mist rising out of meadows, or waters before Sun rise, or after Sunne set: Kites flying high in the ayre: or Ravens gapping against the Sun. hot weather: flocks of lyes playing in the Sunne shine, towards night: Starres seeming dim and fiery red, signifieth drought, or wind, or both.

Signes of Raine.

The Sun at setting hid by a blacke Cloud: the Moone 3. or 4. dayes after the change is blunt on both hornes: a Raine Bow appearing in a faire day, the greener the more raine: extraordinary chattering of the Pheasant or crying of Peacocks or Ducks: the offentwitting of the Duke Castel: licking their hooves behinde: when the biggest Starres onely appeare, as in a mist: Lute or Wall strings cracking, not being touched, byting of seas: soote from Chimneys: ach in old mens bones: sweating of stones.

Signes of Winde.

Red Clouds in a morning: often shooting of starres: Clouds flying swift in a cleere ayre: red Raine Bow: blacke circles, with red streakes about the Sunne or Moone: starres fiery dim: if the Sun beames appeare before

Wood-house. 1642.

before the Sunne riseth, looke for wind and showers, or if the Sun set pale, or be inclosed with a blacke circle neere the time of his setting.

Signes of Cold weather, Frost, Haile.

Clouds flying low: great flocks of small birds gathering together in beginning of winter, either cold stormes, or frosty weather: if in the winter the Sunne shine cleere towards night, and redder then before, any cold wind blowing, especially North, or East winds: extraordinary twinkling of starres a hard frost: Clouds on heapes like to Rocks, in summer haile. in winter snow: an oblique Circle about Sunne or Moone in winter, or a sudden overcasting of the ayre, a sure token of snow: snow falling in the beginning of a frost, if it fall very small, the weather will be colder, and the frost like to hold, but if in great flakes, then the ice thaw very suddenly: other signes of a thaw, may be the sudden turning of the wind, especially in the South, or West.

Eclipses.

There will be 4. of the Sun, the first on the 20 of March, the 2 on the 13 September, but not visible neither of them to us in England. And there will be also, of the Moon visible if not clouded, the 1. on April the 4. the beginning 45 min. after 12 a clock, the totall darknesse 51 min. after 12. the middle 40 min. past one, the first recovery of light 29 min. past 2.

The second Eclipse of the Moon is on 28 September, the beginning 44 min. past 1. totall obscuracion 48 min. past 2, the height or opposition 38 min. past 3, the first recovery, and end 31 minutes past 5.
